Re: Authorization for Change under Ground Water Certificate No.'s 6798-A(G)
and G3-01014C(E)

Dear Mr. Knowles:

In response to your request, you are hereby granted an extension to complete construction for the reason(s) below:

According to your request, development of your project has been slower than anticipated due to the poor economy related to housing sales. You have indicated that it will take additional time to complete the construction of the project and put water to full beneficial use. In review of your request for extension, it appears you have made progress in completing construction of your project. Your request is for a reasonable and short period of time. We will grant you an additional four years to complete construction of Authorization for Change No. 6798-A(G) and five additional years to complete construction under Authorization for Change No. G3-01014C(E).

The new deadline to submit your *Construction Notice*, for both of the above listed authorization for change is **January 1, 2017**.

An approved measuring device must be installed and maintained for each of the sources identified by this water right in accordance with the rule "Requirements for Measuring and Reporting Water Use", WAC 173-173, which describes the requirements for data accuracy, device installation and operation, and information reporting. It also allows a water user to petition the Department of Ecology for modifications to some of the requirements.

Water use data shall be recorded weekly. The maximum rate of diversion/withdrawal and the annual total volume shall be submitted to the Department of Ecology by January 31st of each calendar year.

Recorded water use data shall be submitted via the Internet. To set up an Internet reporting account, contact the Regional Office. If you do not have Internet access, you can still submit hard copies by contacting the Regional Office for forms to submit your water use data.

Department of Ecology personnel, upon presentation of proper credentials, will have access at reasonable times, to the project location, and to inspect at reasonable times, records of water use, wells, diversions, measuring devices and associated distribution systems for compliance with water law.
